**PROPATH**

A Sonic Healthcare Anatomic Pathology Practice

## Client Communication

Dear Colleague,

As previously communicated, we recently changed chemistry and immunology analyzers. After doing so, it is common practice to re-evaluate reference ranges using acquired normal patient data. We have just completed a normal patient evaluation and have updated the reference ranges on the following chemistry analytes:

		Old	New
<b>Alkaline Phosphatase</b>	Adult Female	35-104 U/L	35-137 U/L
<b>Calcium</b>	Adult Range	8.6 - 10.0 mg/dL	8.6 - 10.5 mg/dL
<b>CO2</b>	Normal Range	20 - 29 mmol/L	20 - 31 mmol/L
<b>Creatinine</b>	Adult Female	0.51-0.95 mg/dL	0.49-1.06 mg/dL
	Adult Male	0.7-1.3 mg/dL	0.66-1.41 mg/dL
<b>*Fasting Glucose</b>	Normal Range	<100 mg/dL	70-99 mg/dL

\*We have updated the normal fasting glucose reference range based on CDC recommendations.

As always, our goal is transparency and good communication in our interactions with you so together we can provide the best patient care possible. If you have any concerns or questions, please feel free to contact me at **214.237.1670**.

Thank you,

Carrie Chenault, MD  
Medical Director, ProPath
